Work Experience

AI Engineer, Semmel Health – Petaling Jaya, Selangor, Malaysia, Remote Feb 2026 – Present

- Built Vantix, a hospital-integrated microservice **tracking thousands of patients daily** for Hospital-Acquired Infection (HAI) detection, opening a new business vertical with **50+ prospective clients**.
- Adopted AI-native development** using AI-powered IDE tooling to accelerate feature delivery, reducing development cycles and boosting engineering productivity.
- Achieved 5× performance gain** in the SafetyOS audit microservice via optimized indexing, queries, refactoring, and multithreading.
- Implemented a fully automated CI/CD pipeline, cutting deployment time to under 1 minute** and significantly boosting release velocity.
- Managed AWS cloud infrastructure** for development and production, including secure server access, automated builds, and optimized internal architecture to ensure high availability, reliability, and performance.
- Led 4-engineer team** on SafetyOS features, bug fixes, and project estimates, increasing throughput and delivery consistency.

Senior Software Engineer, Nitex Solutions Ltd – Dhaka, BD March 2025 – Jan 2026

- Led a team of 3 to architect** and launch an AI-Powered fashion trend intelligence platform that **reduced the fashion product design R&D cycle by 80%, from 15 days to 3** and delivered market insights, empowering the sales team with analytics to accelerate buyer decisions.
- Reduced product costing time by >98%** and transformed the company's fashion product costing workflow by delivering an AI powered platform that automated the product cost calculations and enabled instant estimates for buyers.
- Engineered a high-throughput analytics backend using ClickHouse to manage millions of records, enabling complex analytical queries and aggregations up to **10× faster than traditional databases**.
- Enhanced search relevance and UX** by integrating Elasticsearch with OpenAI embeddings to implement semantic vector search.
- Improved API performance 5–10×** through targeted query optimization, multi-threading and code refactoring.
- Achieved 99% data availability** by developing a real-time ETL pipeline synchronizing PostgreSQL databases and Elasticsearch.
- Containerized services, built CI/CD pipelines with GitHub Actions, and deployed applications across AWS and GCP.

Software Engineer, Red Dot Digital IT Ltd – Dhaka, BD August 2023 – March 2025

- Developed and optimized the Robi Axiata Limited RDMS platform, streamlining stock movement from distribution centers to retailers.
- Designed and developed the Single SIM Kit feature of Robi Axiata BD, optimizing inventory management, enabling dynamic package selection, and boosting user experience and sales.
- Architected and implemented the Business Promoter module, **driving revenue growth by boosting SIM sales volume by 30%**.
- Delivered micro features with 100% UAT acceptance**, ensuring seamless integration and alignment with business goals.
- Optimized code for improved performance and resolved bugs using systematic debugging methodologies.
- Leveraged interpersonal skills to build strong relationships and foster seamless team collaboration.

Junior Software Engineer, Nascenia Ltd – Dhaka, BD May 2022 – July 2023

- Researched Bengali NLP and built conversational AI chatbots and recommendation systems.
- Improved chatbot performance by 20%** through analyzing user feedback from different channels and enriching the training dataset of the Chatbot core model.
- Reduced data feeding time by 30%** by implementing automation for both intent and dialogue flow generation.

Technical Skills

- Programming Languages:** Java, Kotlin, Python, C/C++, JavaScript
- Frameworks & Libraries:** Spring Boot, Junit, Mockito, ReactJS, FastAPI, Rasa, Django
- Messaging & Caching:** RabbitMQ, ActiveMQ, Redis
- Database Systems:** PostgreSQL, SQL Server, Oracle, MySQL, ClickHouse, ElasticSearch, MongoDB
- DevOps & Cloud Tools:** AWS (IAM, VPC, EC2, S3, RDS, SSM), GCP (CE), Docker, Kubernetes, CI/CD, GitLab, Nginx, Tomcat
- Architecture & Others:** System Design, Design Patterns, Microservice Architecture, SOLID Principles, OAuth2.0
- Applied AI & AI-Native Dev:** AI-Powered IDEs (Antigravity, Copilot), RAG, Vector Databases (pgvector), LLM Integration (OpenAI, Gemini), Prompt Engineering

Education

Khulna University of Engineering & Technology, BSc in Computer Science

Graduation Year – 2022

Problem Solving and Implementation
